Stall Mattresses for Dairy Cows

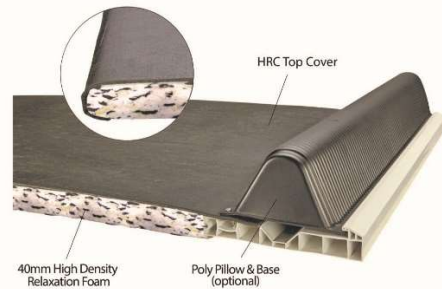

Comfortable Cows Produce More Milk!

Science has proven cow comfort has a dramatic effect on the productivity of dairy cows. For example, studies have shown each additional hour per day of resting time has the potential to generate approximate 1.5 litres of more milk per cow each day. Stall bedding plays a critical factor in improving resting time and DairyPRO has partnered with Promat, the world leader in animal comfort, to offer a choice of stall mattresses to help maximize your cows productivity.

Relaxation Mat

- Optimum density, high durability, 40mm thick Relaxation Foam provides excellent comfort and traction at a very competitive price point
- High-value foam in the Relaxation Mat molds to the exact contour of the cow, giving her outstanding comfort and support, lowering stress and relieving pressure which promotes improved circulation. Engineered, high density foam ensures long life and comfort, with excellent value for money and return-on-investment

Pasture Mat – the Original

- Sustainably-recycled rubber crumb mattress that provides a stable, consistent, long lasting base
- Durable, shock-absorbent and provides stable footing
- The original Pasture Mat set the industry standard when it was introduced over 25 years ago. Today, Pasture Mat continues to provide excellent value and comfort.
- Vertical height from floor: 65mm

Pasture Mat with Relaxation Foam

- The premier mattress solution offering the maximum amount of comfort
- The bottom layer is comprised of a recycled, rubber crumb mattress providing stability and consistent long-lasting comfort base
- Optimum density, high durability, 40mm thick Relaxation Foam provides excellent comfort and traction
- Promat's most proven solution with over 3 million cows enjoying its unmatched comfort
- Vertical height from floor: 105mm

HRC Top Cover – all DairyPRO mattress solutions include Promat’s patented HRC top cover. HRC is an engineered, reinforced polypropylene fabric impregnated with a natural rubber. HRC is also waterproof and resists drying and cracking, unlike the simple rubber top covers used by Promat’s competitors.

Poly Pillow and Base (optional) - Recommended with all our free stall systems to help position the cow which leads to a cleaner stall and less maintenance.

Warranty – All DairyPRO stall mattress systems come with a comprehensive three year warranty.
