

**DAIRYPRO**  
Your Productivity Partner

## “Blast” and “Basket” Fans for Ventilation and Cooling

**Keeping Your Cows Cool and Well-Ventilated Increases Productivity and Profit**

Cows enter heat stress around 20 degrees Celsius. DairyPRO offers a wide range of Blast and Basket Fans to minimize heat stress, circulate fresh air, and minimize flies around your cows.

### Blast Fans

- Available in blade sizes from 140 to 213 cm
- Housing made with durable and corrosion-free fibre composite
- Airflow design to maximize efficiency
- Blades made of thick aluminum alloy
- 1 or 3 phase motor
- Multiple mounting and support configurations available for installations

### Basket Fans

- Available in blade sizes from 61 to 91 mm
- Housing is powder coated to prevent corrosion
- Durable nylon blades
- Airfoil design to increase performance
- 1 or 3 phase motor
- Multiple mounting and support configurations available for installations
