

## Milk Cooling Storage Tanks in many sizes to fit your needs

### MUELLER

- Mueller has both horizontal and vertical models of cooling tanks. The choice of model depends on your business situation. A silo offers a solution if there is limited interior space or the need for very large storage capacity. Horizontal cooling tanks are great solutions if you have enough indoor space.
- Horizontal tank capacities from 1,300-36,000 liters
- Milk Silo capacities: 12,000 to 60,000 liters

### Milkplan

#### Open type Refrigerated Milk Storage Tanks

- Fast and stable cooling and maximum energy saving are common characteristics of all MP Vertitank series models.
- Sizes range from 50L-2500L
- The cooling mechanisms and their capacities have been designed to meet the demands of both sheep and goat units and small cattle farming units.
- Inner and outer tanks are made of durable Stainless Steel
- Simple operation, even in high ambient temperatures
- Quick-installation cooling tank with built-on condensing unit
- Automatic programmed agitation
